

Michael Powell

The proposed change in broadcast ownership will only serve big business, NOT the public.

The LAST place we should be allowing a monopoly to form is in the media.

Without a

variety of news and the ability to hear various points of view, democracy will not work. For

example, how are we supposed to get the information we need to make voting decisions on

candidates running for office locally and nationally?

It is YOUR DUTY to keep our rights preserved. A strong democracy is only helped by

different viewpoints which are already beginning to be lessened.

Michael Powell, the public is watching YOU on this one! Can you really live with yourself if

this change goes through?

Bonnie Klein
